About AB Roofing Solutions Ltd

AB Roofing Solutions Ltd is an industrial roof cladding company based in Sheffield, covering a variety of roofing solutions through the country.

We are specialists in refurb, strip and re-sheet, in overcladding, composite panelling, twin or single skin and removal of asbestos sheets, for offices factories and warehouses. Roof safety lines are fitted for maintenance and storm repairs, commercial gutter repairs or for maintenance purposes.

Our maintenance contractors are available for emergency call outs. If you want any further information or require a no obligation quote please do not hesitate to give us a call on 0114 2799450.

Roofing Services

Cladding

As well as new builds, Wall Cladding and vertical Cladding provide old buildings with a fresh new look.

A B Roofing Solutions Ltd supply, install and replace all type of Cladding Systems to suit your requirements, including Single Skin, Double Skin and Overclad Systems.

Re-furb, Strip and Re-sheet

Consists of the old roof covering being removed and then replaced with a new Roofing System: e.g. A Composite System or A Single Skin Profiled Sheeting.

The benefits are that the project would be planned, scheduled and executed to the clients needs.

Overcladding

Overcladding is a very successful method of hassle free roof replacement and will leave the building looking like new. This consists of overcladding the existing roof covering using the latest sheeting materials.

The benefits using this method are that No disruption or closure of the building, as the existing roof is still in place. It will upgrade the thermal performance of the building by introducing insulation between the old and new roof.

Asbestos Roofing

Asbestos roofing is made up from asbestos cement and asbestos fibres and is still present on many old buildings across the country. Overtime, problems arise through hook bolt seals perishing, asbestos roof sheets cracking and live vegetation eating through the asbestos roof sheets.

A B Roofing Solutions Ltd are certified to repair asbestos roofing, as well as manage the removal of old asbestos roofing, ready for the installation of new roof covering in its place.

Composite Roofing

Composite Roofing comprises of an inner liner sheet and an outer corrugated roofing panel with an insulated core, all in one composite panel. It is a modern industrial roofing system that is very popular in refurbishment as well as new builds.

A B Roofing Solutions Ltd has over 25 years experience in installing the Composite Systems and Wall Panels and we are happy to discuss the options what would suit your building.

Gutters

Plygene Gutter Lining

Plygene Gutter Lining is a proven hard wearing Gutter Lining solution, to stop gutters leaking for good. The Plygene Gutter Lining material is incredibly hard wearing and is pliable enough to mould to any gutter profile and it carries a 20 year guarantee.

The unique Gutterline System creates a totally sealed, fully waterproof "gutter within a gutter" leaving the original gutter untouched, so there is no need for structural work.

AB Roofing Solutions Ltd are approved installers of the Plygene Gutter Lining System.

Gutter Maintenance

Gutter Maintenance is an essential part in keeping the gutters free from blockages, leaks and overflows.

Ideally the gutters need to be cleared from any obstacles every 6 – 12 months to keep the rain water running freely and to avoid catastrophic and costly events.

We also provide gutter refurbishments, repairs and replacements.

Skylights/Rooflights

Roof skylights are often referred to as Roof Lights and their sole purpose is to allow daylight to shine through the roof into the building, helping save on lighting costs. Over time they can discolour, warp and break. Even skylight fixings can work loose over time.

At A B Roofing Solutions Ltd, we supply and install new Roof Lights as well as refurbish, repair and replace existing skylights (including asbestos roof skylights, steel roof skylights and step safe skylights).

Roof Safety Line Systems

A B Roofing Solutions Ltd can install Roof Mounted Safety Line from market leading manufacturers. Safety Line should be considered for your first choice to prevent falls when access to Rooftops is required.

The flexible systems are designed to operate horizontally, vertically, around detailed roofs and up and down reclines. They offer protection and comply with all current legislation. Each system is designed to the client's specific requirements. They can be fixed to a solid structure, single ply membranes or felt systems and are capable of being fixed to a built up or composite metal sheets. We also offer an annual service inspection of the Roof Safety Line System.

Reactive Maintenance

AB Roofing Solutions Ltd can also provide nationwide roofing support to clients.

Call-out responses to Roof/Gutters leaks are available. Our Reactive Maintenance Team provides repairs with like for like materials, fully equipped service vehicles with on board access equipment, photographic equipment for a professional survey report and an array of remedial repair compounds.

Maintenance Contracts

Planned Roof Maintenance Contracts are undertaken, cleaning, maintenance and repairs of Industrial, Commercial and retail Roofs through the country.

We provide service solutions that can save our client time and money, with an annual contract.

Liquid Coating Systems

We use a wide range of liquid coating systems from a One Coat repair product, to a Three coat 25 year Guaranteed system. By choosing the right liquid coating system you can seal and prevent roof leaks and significantly extend the roofs lifespan, avoiding the possible expense of a complete re-roof.

Specialist waterproof roof coatings are available for the following:

- Metal Pitched Roofs
- Asphalt and Felt Roof
- Metal, Concrete, Felt, Asphalt and Asbestos Gutters

The benefits of roof coverings are:

- Maximum waterproof protection
- Cold application avoiding Health and Safety Issues as no heat is needed.
